

Course duration : 40 Days.

Introduction to Data Science

- Need for Data Scientists
- Foundation of Data Science
- What is Business Intelligence
- What is Data Analysis
- What is Data Mining
- What is Machine Learning
- Analytics vs Data Science
- Value Chain
- Types of Analytics
- Lifecycle Probability
- Analytics Project Lifecycle

Data

- Basis of Data Categorization
- Types of Data
- Data Collection Types
- Forms of Data & Sources
- Data Quality & Changes
- Data Quality Issues
- Data Quality Story
- What is Data Architecture
- Components of Data Architecture
- OLTP vs OLAP
- How is Data Stored?

Big Data

- What is Big Data?
- 5 Vs of Big Data
- Big Data Architecture
- Big Data Technologies
- Big Data Challenge
- Big Data Requirements
- Big Data Distributed Computing & Complexity
- Hadoop
- Map Reduce Framework
- Hadoop Ecosystem

Data Science Deep Dive

- What Data Science is
- Why Data Scientists are in demand
- What is a Data Product
- The growing need for Data Science
- Large Scale Analysis Cost vs Storage
- Data Science Skills

- Data Science Use Cases
- Data Science Project Life Cycle & Stages
- Map Reduce Framework
- Hadoop Ecosystem
- Data Acquisition
- Where to source data
- Techniques
- Evaluating input data
- Data formats
- Data Quantity
- Data Quality
- Resolution Techniques
- Data Transformation
- File format Conversions
- Anonymization

Intro to R Programming

- Introduction to R
- Business Analytics
- Analytics concepts
- The importance of R in analytics
- R Language community and eco-system
- Usage of R in industry
- Installing R and other packages
- Perform basic R operations using command line
- Usage of IDE R Studio and various GUI

R Programming Concepts

- The datatypes in R and its uses
- Built-in functions in R
- Subsetting methods
- Summarize data using functions
- Use of functions like head(), tail(), for inspecting data
- Use-cases for problem solving using R

Data Manipulation in R

- Various phases of Data Cleaning
- Functions used in Inspection
- Data Cleaning Techniques
- Uses of functions involved
- Use-cases for Data Cleaning using R

Data Import Techniques in R

- Import data from spreadsheets and text files into R
- Importing data from statistical formats
- Packages installation for database import
- Connecting to RDBMS from R using ODBC and basic SQL queries in R

- Web Scraping
- Other concepts on Data Import Techniques

Exploratory Data Analysis (EDA) using R

- What is EDA?
- Why do we need EDA?
- Goals of EDA
- Types of EDA
- Implementing of EDA
- Boxplots, cor() in R
- EDA functions
- Multiple packages in R for data analysis
- Some fancy plots
- Use-cases for EDA using R

Data Visualization in R

- Story telling with Data
- Principle tenets
- Elements of Data Visualization
- Infographics vs Data Visualization
- Data Visualization & Graphical functions in R
- Plotting Graphs
- Customizing Graphical Parameters to improve the plots
- Various GUIs
- Spatial Analysis
- Other Visualization concepts

HADOOP

Big Data and Hadoop Introduction

- What is Big Data and Hadoop?
- Challenges of Big Data
- Traditional approach Vs Hadoop
- Hadoop Architecture
- Distributed Model
- Block structure File System
- Technologies supporting Big Data
- Replication
- Fault Tolerance
- Why Hadoop?
- Hadoop Eco-System
- Use cases of Hadoop
- Fundamental Design Principles of Hadoop
- Comparison of Hadoop Vs RDBMS

Understand Hadoop Cluster Architecture

- Hadoop Cluster & Architecture
- 5 Daemons
- Hands-On Exercise
- Typical Workflow
- Hands-On Exercise
- Writing Files to HDFS
- Hands-On Exercise
- Reading Files from HDFS
- Hands-On Exercise
- Rack Awareness
- Before Map Reduce

Map Reduce Concepts

- Map Reduce Concepts
- What is Map Reduce?
- Why Map Reduce?
- Map Reduce in real world.
- Map Reduce Flow
- What is Mapper?
- What is Reducer?
- What is Shuffling?
- Word Count Problem
- Hands-On Exercise
- Distributed Word Count Flow & Solution
- Log Processing and Map Reduce
- Hands-On Exercise

Advanced Map Reduce Concepts

- What is Combiner?
- Hands-On Exercise
- What is Partitioner?
- Hands-On Exercise
- What is Counter?
- Hands-On Exercise
- InputFormats/Output Formats
- Hands-On Exercise
- Map Join using MR
- Hands-On Exercise
- Reduce Join using MR
- Hands-On Exercise
- MR Distributed Cache
- Hands-On Exercise
- Using sequence files & images with MR
- Hands-On Exercise
- Planning for Cluster & Hadoop 2.0 Yarn
- Configuration of Hadoop
- Choosing Right Hadoop Hardware?
- Choosing Right Hadoop Software?
- Hadoop Log Files?

Hadoop 2.0 & YARN

- Hadoop 1.0 Challenges
- NN Scalability
- NN SPOF & HA
- Job Tracker Challenges
- Hadoop 2.0 New Features
- Hadoop 2.0 Cluster Architecture & Federation
- Hadoop 2.0 HA
- Yarn & Hadoop Ecosystem
- Yarn MR Application Flow

PIG

- Introduction to Pig
- What Is Pig?
- Pig's Features & Pig Use Cases
- Interacting with Pig
- Basic Data Analysis with Pig
- Hands-On Exercise
- Pig Latin Syntax
- Loading Data
- Hands-On Exercise
- Simple Data Types
- Field Definitions
- Data Output
- Viewing the Schema
- Hands-On Exercise
- Filtering and Sorting Data
- Hands-On Exercise
- Commonly-Used Functions
- Hands-On Exercise: Pig for ETL Processing
- Processing Complex Data with Pig
- Hands-On Exercise
- Storage Formats
- Complex/Nested Data Types
- Hands-On Exercise
- Grouping
- Hands-On Exercise
- Built-in Functions for Complex Data
- Hands-On Exercise
- Iterating Grouped Data
- Hands-On Exercises
- Multi-Dataset Operations with Pig
- Hands-On Exercise
- Techniques for Combining Data Sets

Practice Set - 1

- Joining Data Sets in Pig
- Hands-On Exercise
- Splitting Data Sets

- Hands-On Exercise

HIVE

- Hive Fundamentals & Architecture
- Loading and Querying Data in Hive
- Hands-On Exercise
- Hive Architecture and Installation
- Comparison with Traditional Database
- HiveQL: Data Types, Operators and Functions,
- Hands-On Exercise
- Hive Tables ,Managed Tables and External Tables
- Hands-On Exercise
- Partitions and Buckets
- Hands-On Exercise
- Storage Formats, Importing Data, Altering Tables, Dropping Tables
- Hands-On Exercise
- Querying Data, Sorting and Aggregating, Map Reduce Scripts,
- Hands-On Exercise

Practice Set - 2

- Joins & Sub queries, Views
- Hands-On Exercise
- Integration, Data manipulation with Hive
- Hands-On Exercise
- User Defined Functions,
- Hands-On Exercise
- Appending Data into existing Hive Table
- Hands-On Exercise
- Static partitioning vs dynamic partitioning
- Hands-On Exercise

HBASE

- CAP Theorem
- HBase Architecture and concepts
- Introduction to HBase
- Client API's and their features
- HBase tables The ZooKeeper Service
- Data Model, Operations

Practice Set - 3

- Programming and Hands on Exercises

SQOOP

- Introduction to Sqoop
- MySQL Client & server
- Connecting to relational data base using Sqoop
- Importing data using Sqoop from Mysql
- Exporting data using Sqoop to MySql
- Incremental append
- Importing data using Sqoop from Mysql to hive
- Exporting data using Sqoop to MySql from hive
- Importing data using Sqoop from Mysql to hbase
- Using queries and sqoop

Flume & Oozie

- What is Flume?
- Why use Flume, Architecture, configurations
- Master, collector, Agent
- Twitter Data Sentimental Analysis project
- Oozie
- What is Oozie, Architecture, configurations?
- Oozie Job Submission
- Oozie properties
- Hands on exercises

Projects

- Social Media Final Project
- Hadoop Project
- Objective
- Problem Definition
- Solution
- Discuss data sets and specifications of the project.

Project in Healthcare Domain

- Hadoop Project in Healthcare
- Objective
- Problem Definition
- Solution
- Discuss data sets and specifications of the project.

Project in Finance/Banking Domain

- Hadoop Project in Banking Domain
- Objective
- Problem Definition
- Solution
- Discuss data sets and specifications of the project.

Spark

Apache Spark

- Introduction to Apache Spark
- Why Spark
- Batch Vs. Real Time Big Data Analytics
- Batch Analytics – Hadoop Ecosystem Overview,
- Real Time Analytics Options,
- Streaming Data – Storm,
- In Memory Data – Spark, What is Spark?,
- Spark benefits to Professionals
- Limitations of MR in Hadoop
- Components of Spark
- Spark Execution Architecture
- Benefits of Apache Spark
- Hadoop vs Spark

Scala

- Features of Scala
- Basic Data Types of Scala
- Val vs Var
- Type Inference
- REPL
- Objects & Classes in Scala
- Functions as Objects in Scala
- Anonymous Functions in Scala
- Higher Order Functions
- Lists in Scala
- Maps
- Pattern Matching
- Traits in Scala
- Collections in Scala

Spark Architecture

- Spark & Distributed Systems
- Spark for Scalable Systems
- Spark Execution Context
- What is RDD
- RDD Deep Dive
- RDD Dependencies
- RDD Lineage
- Spark Application In Depth
- Spark Deployment
- Parallelism in Spark
- Caching in Spark

Spark Internals

- Spark Transformations
- Spark Actions

- Spark Cluster
- Spark SQL Introduction
- Spark Data Frames
- Spark SQL with CSV
- Spark SQL with JSON
- Spark SQL with Database

Spark Streaming

- Features of Spark Streaming
- Micro Batch
- Dstreams
- Transformations on Dstreams
- Spark Streaming Use Case

Statistics + Machine Learning

Statistics

Whats is Statistics

- Descriptive Statistics
- Central Tendency Measures
- The Story of Average
- Dispersion Measures
- Data Distributions
- Central Limit Theorem
- What is Sampling
- Why Sampling
- Sampling Methods
- Inferential Statistics
- What is Hypothesis testing
- Confidence Level
- Degrees of freedom
- what is pValue
- Chi-Square test
- What is ANOVA
- Correlation vs Regression
- Uses of Correlation & Regression

Machine Learning

Machine Learning Introduction

- ML Fundamentals
- ML Common Use Cases
- Understanding Supervised and Unsupervised Learning Techniques
- Clustering
- Similarity Metrics
- Distance Measure Types: Euclidean, Cosine Measures

- Creating predictive models
- Understanding K-Means Clustering
- Understanding TF-IDF, Cosine Similarity and their application to Vector Space Model
- Case study
- Implementing Association rule mining
- Case study
- Understanding Process flow of Supervised Learning Techniques
- Decision Tree Classifier
- How to build Decision trees
- Case study
- Random Forest Classifier
- What is Random Forests
- Features of Random Forest
- Out of Box Error Estimate and Variable Importance
- Case study
- Naive Bayes Classifier.
- Case study
- Project Discussion
- Problem Statement and Analysis
- Various approaches to solve a Data Science Problem
- Pros and Cons of different approaches and algorithms.
- Linear Regression
- Case study
- Logistic Regression
- Case study
- Text Mining
- Case study
- Sentimental Analysis
- Case study

Python

Getting Started with Python

- Python Overview
- About Interpreted Languages
- Advantages/Disadvantages of Python pydoc.
- Starting Python
- Interpreter PATH
- Using the Interpreter
- Running a Python Script
- Python Scripts on UNIX/Windows
- Python Editors and IDEs.
- Using Variables
- Keywords
- Built-in Functions
- StringsDifferent Literals
- Math Operators and Expressions
- Writing to the Screen
- String Formatting
- Command Line Parameters and Flow Control.

Sequences and File Operations

- Lists
- Tuples
- Indexing and Slicing
- Iterating through a Sequence
- Functions for all Sequences
- Using Enumerate()
- Operators and Keywords for Sequences
- The xrange() function
- List Comprehensions
- Generator Expressions
- Dictionaries and Sets.

Deep Dive – Functions Sorting Errors and Exception Handling

- Functions
- Function Parameters
- Global Variables
- Variable Scope and Returning Values. Sorting
- Alternate Keys
- Lambda Functions
- Sorting Collections of Collections
- Sorting Dictionaries
- Sorting Lists in Place
- Errors and Exception Handling
- Handling Multiple Exceptions
- The Standard Exception Hierarchy
- Using Modules
- The Import Statement
- Module Search Path
- Package Installation Ways.

Regular Expressionsit's Packages and Object Oriented Programming in Python

- The Sys Module
- Interpreter Information
- STDIO
- Launching External Programs
- PathsDirectories and Filenames
- Walking Directory Trees
- Math Function
- Random Numbers
- Dates and Times
- Zipped Archives
- Introduction to Python Classes
- Defining Classes
- Initializers

- Instance Methods
- Properties
- Class Methods and DataStatic Methods
- Private Methods and Inheritance
- Module Aliases and Regular Expressions.

Debugging and Project Artefacts

- Debugging
- Dealing with Errors
- Using Unit Tests
- Project Skeleton
- Required Packages
- Creating the Skeleton
- Project Directory
- Final Directory Structure
- Testing your Setup
- Using the Skeleton
- Creating a Database with SQLite 3
- CRUD Operations
- Creating a Database Object.

Machine Learning Using Python

- Introduction to Machine Learning
- Areas of Implementation of Machine Learning
- Why Python
- Major Classes of Learning Algorithms
- Supervised vs Unsupervised Learning
- Learning NumPy
- Learning Scipy
- Basic plotting using Matplotlib
- Machine Learning application

Supervised and Unsupervised learning

- Classification Problem
- Classifying with k-Nearest Neighbours (kNN)

Algorithms

- General Approach to kNN
- Building the Classifier from Scratch
- Testing the Classifier
- Measuring the Performance of the Classifier.
- Clustering Problem
- What is K-Means Clustering
- Clustering with k-Means in Python and an

Application Example.

- Introduction to Pandas
- Creating Data Frames
- Grouping/Sorting
- Plotting Data
- Creating Functions
- Converting Different Formats
- Combining Data from Various Formats
- Slicing/Dicing Operations.

Scikit and Introduction to Hadoop

- Introduction to Scikit-Learn
- Inbuilt Algorithms for Use
- What is Hadoop and why it is popular
- Distributed Computation and Functional Programming
- Understanding MapReduce Framework Sample MapReduce Job Run.

Hadoop and Python

- PIG and HIVE Basics
- Streaming Feature in Hadoop
- Map Reduce Job Run using Python
- Writing a PIG UDF in Python
- Writing a HIVE UDF in Python
- Pydoop and MRjob Basics.
